

## Lifecycle

## Products

## Pre-Project

**Purpose**  
To formalise a proposal for a project and put it in the context of other actual or potential work being carried out  
To create a short statement to justify and prioritise a Feasibility investigation

**Objectives**  
Describe the business issue to be addressed  
Identify a Business Sponsor and Business Visionary  
Confirm that the proposed project is in line with business strategy  
Scope, plan and resource the Feasibility phase

**Preconditions**  
An idea for a project

**Products**  
Terms of Reference

**Resources**  
Required resources available to create the Terms of Reference

## Feasibility

**Purpose**  
To decide whether a proposed project is viable from both a business and technical perspective, by means of a high-level investigation of potential solutions, costs and timeframes

**Objectives**  
Establish whether there is a feasible solution to the business issue  
Identify benefits likely to arise from delivery of the proposed solution  
Outline possible approaches to delivery of the proposed solution  
Describe the organisational and governance aspects of the project  
State first-cut estimates of timescale and cost for the project  
Plan and resource the Foundations phase

**Preconditions**  
Approved Terms of Reference  
Plan for Feasibility

**Products**  
Feasibility Assessment, including:  
- Business Case  
- Epic requirements (~10)  
- Solution architecture  
- Development approach  
- Delivery Plan (project only)  
- Management approach

**Resources**  
Required resources available to carry out the feasibility study  
Business Visionary available to help shape the project

**Project Approach Questionnaire**

## Foundations

**Purpose**  
To establish firm and enduring foundations for the project, providing a project focus that is both robust and flexible

**Objectives**  
Baseline high-level requirements  
Describe business processes to be supported by the proposed solution  
Identify information used, created and updated by the proposed solution  
Describe strategies for all aspects of solution deployment  
Detail the Business Case for the project  
Start designing solution architecture  
Define technical implementation standards  
Describe how quality will be assured  
Establish appropriate governance and organisation for the project  
Describe solution development lifecycle for the project, with techniques to management and monitor the project  
Baseline a schedule for development and deployment activities  
Describe, assess and manage risk associated with the project

**Preconditions**  
Agreed Feasibility Assessment  
Plan for Foundations

**Products**  
Business Case  
Prioritised Requirements List  
Solution Architecture  
\* Solution Prototype  
Development Approach  
Delivery Plan (increments)  
Management Approach  
Foundations Summary  
Project Approach Questionnaire

**Resources**  
Significant business input is required  
The Project Manager and Technical Coordinator are respectively responsible for setting up the management and technical controls

## Evolutionary Development

**Purpose**  
To evolve the solution, to converge over time on an accurate solution that meets business need, and that is built the right way from a technical perspective

**Objectives**  
On a timebox-by-timebox basis:  
- Elaborate on the requirements in the Prioritised Requirements List  
- Fully explore the business need and provide detailed requirements for the evolving solution  
- Evolve the solution so that it demonstrably meets the needs of the business  
- Give the wider organisation an early view of the solution that they will eventually operate, support and maintain  
Plan deployment and, if appropriate, benefits realisation

**Preconditions**  
Business, Solution and Management Foundations have been accepted  
Development environments are in place and adequately resourced to support solution development  
All required project personnel and stakeholders are engaged as necessary

**Products**  
# Prioritised Requirements List  
Evolving Solution  
# Delivery Plan, including:  
- Deployment Plan  
- Benefits Realisation Plan  
Timebox Plan (Team Wall)  
Timebox Review Records

**Resources**  
All required project personnel and stakeholders are engaged as necessary  
The physical and technical environments are in place and adequately set up to support the development of the solution

## Deployment

**Purpose**  
To bring a baseline of the evolving solution into operational use. The release may be the final solution, or a subset it, or an interim solution. After the final release, the project is formally closed.

**Objectives**  
**Assemble**  
Assemble the solution to be deployed, and conduct any final testing of it. Where applicable, train end users of the solution and/or provide necessary documentation  
**Review**  
Confirm readiness for deployment of the Solution Increment; go/no-go decision  
Conduct increment retrospective  
**Deploy**  
Deploy the solution increment into the live business environment. Assess the deployed solution. Decision to proceed with next increment; replan if necessary. Decision to close the project; project retrospective

**Preconditions**  
The elements of the Solution Increment have been developed

**Products**  
Project Review Report  
Deployed Solution Increment

**Resources**  
Resources required to effect the deployment plan, replan if necessary, and conduct increment and project retrospectives

## Post-Project

**Purpose**  
To reflect on the performance of the project in terms of the business value achieved

**Objectives**  
Assess whether the benefits described in the Business Case (where created) have actually been achieved through use of the Deployed Solution

**Preconditions**  
The solution has been successfully deployed

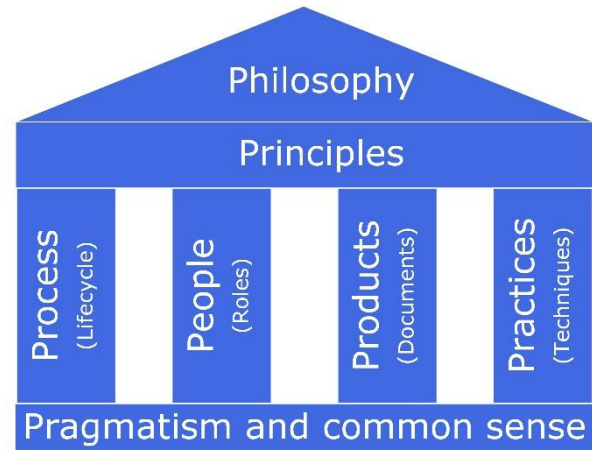

**Products**  
Benefits Assessment

**Resources**  
The Business Sponsor and Business Visionary have an ongoing responsibility for ensuring that the benefits enabled by the project are actually realised through proper use of the solution provided
